To: Gardnerville Town Board Members  
From: Julie Duda

Regarding: Agenda item 12

The Town Manager has compiled an organized and informative analysis for this agenda item. Last week, I reviewed the background and analysis and had several questions on related details which I discussed with Erik.

The trail, recreation, watercourse and detention open space system consists of multiple goals and actions to be constructed by various participants. Clearly, the pieces are in play at various stages and going forward the relevant action will be to monitor and review the pieces as they connect to the system.

Recommendation: Support the Town Manager's recommendation to decline action of directing preparation of a plan that integrates trail, recreation, watercourse and detention into a connected open space system. Furthermore, I commend Erik for his excellent compilation and analysis of a complex issue.

My appreciation to Carol and Marie for making the relevant information available.
